

Ongoing issue with statistics reporting between 2022-06-11 and 2022-07-19

Between 2022-06-11 and 2022-07-19, a change to our internal systems caused some app installs and uninstalls to be ignored. You may see a reduction in your installs, acquisitions, and engagement metrics during this time.

This issue did not impact the actual number of installs for your app, or your app's visibility on Google Play. We're working on fixing the issue now.
