	In the past we:	Current	In the future we may
For currently active releases	Created, Tested, Released a version of a mobile app	Notifications of issue(s), triage, select some to be addressed	Ameliorate or fix issue(s) to target for future release(s)

A Future Release	Create, Test, and Release a newer version of the mobile app	Observe issues, check for signs of improvements, ongoing (known unaddressed) issues, and new issues	Consider ways to improve the design and implementation of information gathering
